Product Listing 2010

tinfix design - sennelier

Tinfix Design comprise highly concentrated dyes, specifically made for artists and designers, in a range of 56 colours for painting onto silk, wool, leather, paper and other woven fabrics. The colours are rich and vibrant, but the range also contains very subtle hues and pastel tones, all of which are completely intermixable and may be infinitely diluted with water. Setting of the dyes in fashion fabrics is achieved through a variety of means, but steaming or microwaving is easiest. Colours will vary in lightfastness, due to the individual chemical content, and Sennelier have labelled each colour accordingly, plus the salt reactivity.

C100.01 Tinfix Design Colours

All colours (100ml).

C100.01

C100.03 Tinfix Thickener Mix with Tinfix Design Colours to thicken for various techniques, including printing and direct painting. Wait 10 minutes before painting on to fabric. 250ml.
